Experience ↩

Guidehouse

Frontend Developer

MARCH 2020 - PRESENT

Lead the development effort to create a robust library of scalable, reusable components. Collaborated closely with the design team to formalize an organized system of design tokens and assets. Published detailed documentation and reference guides for team members. Leveraged NgRx and reactive programming techniques to transform raw data into rich, stateful, interactive user experiences.

Whereoware

Marketing Developer (Frontend)

JUNE 2017 - MARCH 2020

Developed marketing landing pages and other digital campaign assets with web technologies for 60+ clients. Introduced modern web development frameworks, such as React, into the digital team's technology stack.
